

QChartView

```
classDiagram
    class QChartView
    class CustomChartView {
        + CustomChartView()
        # keyPressed()
    }
    CustomChartView --|> QChartView
```

The diagram illustrates a class hierarchy. At the top is the 'QChartView' class, represented by a white box with a black border and three horizontal compartments. The top compartment contains the class name 'QChartView', while the other two are empty. Below it is the 'CustomChartView' class, represented by a gray box with a black border and three horizontal compartments. The top compartment contains the class name 'CustomChartView', the middle compartment is empty, and the bottom compartment contains the class signature '+ CustomChartView()' followed by the method signature '# keyPressed()' on the next line. A blue arrow with an open triangular head points from the top of the 'CustomChartView' box to the bottom of the 'QChartView' box, indicating inheritance.

CustomChartView

+ CustomChartView()  
# keyPressed()
